The county search who has so much trouble to plug up their holes ought to be hearty in favor of stock law

There are many people through out the counties who are going to try the Colonel to hold up bishop when he is through with it instead of pitching it about in the ring

Probably Scott and the other fellow who spell his name Ammunson will look over the nation pretty thoroughly before they accept the Chautauqua platform

Opelika is talking for a cannery plant. Hitch in Dothan's cows. We will have things humming here in a few months furnishing cans for those who want it

It took Mrs Jack Cudahy a long time to make up her mind about her children. She has decided now that she wants them and will go in to court and ask the Judge about it

Vice President Sherman thinks it might spoil to say nothing about asking for another term but he hasn't anything on the Hon Chas Warren who behaved rather nicely under the same circumstances

Hobson has lost not of his old nerve in convincing the voters that he ought to be kept in congress. He is making a good deal of fun for the voters in his district calling against Moody or rather Moody is running against him

Probably the April primary will end the wet spell that has been with us for so long. The people then can forget everything even the political promises and take up the thread of life where they left off before they were besieged by pot and candidates

Brother Hare of the Muskogee News says it this way Running a forty horse power automobile on a four horse power salary is said by one to be the cause of so much fault and embezzlement. Too true the thirty dollar clerk spending fifty dollars on fun

A young man who had access to the express office because he had formerly been employed by the company, was the other day arrested in Georgia charged with taking a package of $500. He jumped the town the same night but was picked up the next day

The county commissioners cut the middle out of the treasurer's salary of Houston county at their meeting last month. They reduced it to $600 and it no longer was attractive to make much of a scrap

TALK WITH THE COMMISSIONERS

There are some who pretend to think that the board of county commissioners have the power to issue bonds to build roads. It really does look like that Houston county should have a citizen who does not know better but it has been reported that there are people who believe the commissioners can put a road bond issue without a vote of the people.

This board of county commissioners or the one that is to succeed it will have no power to issue bonds. All they can do is order an election and allow the voters of the county to settle the question as to whether bonds will be issued or not

All roads of this section are bad now. They would have been better if they had been left alone. Dr. W. has [illegible] any the [illegible] of the old road bed. In only little places is it [illegible] to [illegible] the road. Rather than the person [illegible] the road [illegible] to skip [illegible] material [illegible] only skim the surface [illegible] not [illegible] made [illegible] road [illegible] Dothan [illegible] we are [illegible] to [illegible] the [illegible] road [illegible] to [illegible] this [illegible] the last [illegible] and [illegible] Rapidly [illegible] water [illegible] bar [illegible] through [illegible] hills

INCENSE TO WOMAN

It takes a hundred men to make an encampment but one woman can make a home. I not only admire woman as the most beautiful object ever created but I see revealed her to the redeeming glory of humanity the sanctuary of all the virtues the pledge of all perfect qualities of heart and head. It is not just our right to lay the place of men at the feet of women. It is because women are so much better than men that their faults are considered less. A man's desire is the foundation of his love but a woman's desire is born of her love. The one thing in this world that is constant the one gift that rises above all cloud the one window in which the light never turns the one star that darkness cannot quench is woman's love. It rises to the greatest heights it sinks to the lowest depths. It forgives the most cruel injuries. It is perennial of life and grows in every climate. Neither coldness nor neglect hatred nor cruelty can extinguish it. A woman's love is the perfume of the heart. This is the real love that subdues the earth the love that has wrought all miracles of art that gives us music all the way from the cradle song to the grand closing symphony that learn the soul away on wings of fire. A love that is greater than power sweeter than life and stronger than death

LUKE 18 9-17

And he spake his parable unto certain which trusted in themselves that they were righteous and despised others

Two men went up into the temple to pray the one a Pharisee and the other a publican

The Pharisee stood and prayed thus with himself God I thank thee that I am not as other men are extortioners unjust adulterers or even as this publican

I fast twice in the week I give tithes of all this I possess

And the publican standing afar off would not lift up so much as his eyes unto Heaven but smote upon his breast, saying God be merciful to me a sinner

I tell you this man went down to his house justified rather than the other for every one that exalteth himself shall be abased and he that humbleth himself shall be exalted

And they brought unto him also infants that he would touch them but when his disciples saw it they rebuked them

But Jesus call them unto him and said Suffer little children to come unto me and forbid them not for such is the Kingdom of God

Verily I say unto you Who ever shall not receive the Kingdom of God as a little child shall in no wise enter therein

PHYSICAL EFFECTS OF IMMIGRATION

What will be the physical effect on the American people of the flood of immigration from Europe. This question is asked by Dr Henry M Friedman acting assistant surgeon of the Public Health and Marine Hospital service. In an article in a recent issue of the Journal of the American Medical Association Dr Friedman summarizes his five years experience as medical inspector at Ellis Island. After discussing the physical development of the immigrant from various European nation Dr Friedman says that what interests us most in the physical development of the European people is whether in view of the great influx of people from the continent into this country, a crossing of our blood with that of races having a much poorer physical development will have a deleterious effect on our own physical stamina whether a crossing with the better northern race will have a tendency to improve our own standard of muscular development or whether there will be no effect. If we take the view that the poorly developed races of Europe owe their undevelopment to a distinct degeneration in the evolution of man due in part to the frequent crossing between widely different races then their coming here in very large number might have the same effect. If on the other hand we take the view that their poor physiques are due only to their extreme poverty poor hygiene surroundings ignorance and disease then their coming here of properly distributed can but elevate people who can be elevated in no better ways

IS ADVERTISING A SCIENCE?

By Burt Moses

Some very able gentlemen have been asserting for ten or more years that advertising is an exact science

The number who hold this opinion is larger now than ever before

Recently a writer asserted that advertising science can predict what will come to pass that advertising when scientifically administered is certainly that advertising science will eliminate all chance and come home with the bank roll every time

All this I am willing guardedly to admit but what I have been selling as assiduously as ever old Diogenes sought the honest man is the individual who has mastered the science of advertising

If there is such a man or more than one of him the world is ready to turn a flood of gold into his lap and sign him to an exalted place with Copernicus Aristotle Newton Darwin and other giants who have lifted mankind from the grovelling stage to the plane of absolute knowledge

A writer of ability can take the subject of Science and twist and turn it into a thousand different shapes

He can encompass it into a maze of words that seemingly drive to a more or less logical conclusion but which in reality do nothing of the sort

Nobody really understands what it all means and more than you can understand Mary Baker Eddy's great book or many passages in the Bible

There is no science of health beyond the plain rules of living right and this is something any man or woman can do by simply doing it but it doesn't is most folks don't or won't

The science of health talks to tobacco but the fact remains that most people who reach ninety or one hundred years are inveterate users of tobacco—which doesn't mean that they smoke cigarettes

Really the centenarians seem to know quite a little more about longevity than the professors

OPPORTUNITY

A few months ago the papers were full of news from Portugal. Revolution was rife and the leader of this revolution feeling positive that the King had turned against him committed suicide when lo instead of disaster victory was pounding on the gates and his comrades swept on over his dead body to the success which their leader had not foreseen

Cato committed suicide on the eve of victory

Over and over again we find men ready to give up at the pivotal point when if they had just kept on one day longer opportunity would have burst in the door

This is the wonderful sonnet written by John J Ingalls on the subject of Opportunity wherein the argument is made that Opportunity knocks but once at each man's door But the real fact is Opportunity plays a continual anvil chorus on every man's portals—but of course if he is knocking at the time he will not hear Opportunity when she knocks

Some years ago in San Francisco lived two clerks who had desks adjoining They were so much alike—so much in competition with each other—that they bickered with not ceasing

The passed aspersions then epithets and finally paperweights and inkwells

Then they rushed for the Old Man's office They flatly told him that he must take his choice—one of them would have to go He promptly fired them both

Being in the same boat they now sympathize with each other They decided to form a partnership

They went down into Chinatown and started a store employing only Chinese clerks Whether they evolved pigtails I can not say but both of them learned to chin chin in Chink and had the epigrams of Confucius at their tongues end Also they wore their shirts outside their pants in order to prove the poetic unity

They began to import Chinese goods and sell them to American stores Later they moved over to China And now they control practically all Chinese importations

It was a pivotal point that made the fortunes of these young men a pivotal point seized upon and utilized

Are things going bad with you? Well size them up look them in the eye and right about face It probably is a pivotal point in your career

Every [illegible] of times [illegible] you anyway [illegible] to let [illegible] The disastrous thing is [illegible] mind become chronic [illegible] pivotal point comes [illegible] appeal to your whys and wherefores —The Iberian

EF I WUZ A POET

Ef I wuz a poet I'd write "Oh, my!"
"There's something in the air that makes me sigh!"
"There's something that makes a man wish he
Ef he kin he'll up an' fly!"
He begins to sing "Oh, the flower an' the
wildy
It seems to say "Ef ye'll be the wind an' I'll be the child
Ef it seems like a girl wuz the allurin' thing
An' my! but it's pretty to say that it
holds
Long enough the waves in the night
that sing

Ef I wuz a poet I'd tell how it creeps
An' sich an' sich from the sky
An' keeps sifin' down till the whole
world is gone
An' takes all the air to the day that's
gone by
I'd try to think of the things
That clutter the earth when the wind
is here,
An' then how the snow comes so softly
an' brings
A robe o' white velvet all clean an' all
clear

Th' barn ugly fer a few hours then
bangin
Until they're like pie a sill of ivory
white
I reckon a man made of wood would
assume
"Fer some kind o' wood is not a-sin' that
might
An' telegraft wires why they're sugar
made o' pearl
That droops in long curves as they
reach far away
An' down where the river is th' little
lily an' shell
Like marble that's sculptured to show
driven spray

Ef I wuz a poet — But I never had
No gifts to express what I'm sure to say
Ef I wuz a poet I know I'd be kind
To write to the crowd in what words I
could find
An' I'd write a verse that it will tell how
it creeps
Right down to each th' all th' beauty
fain th' earth
Till th' guardian a mortal I give on it
an' leaps
In jewels that spread like nature's own
mirth

The Man With the Conundrum Again

He entered the office diently and sidled over to the desk of the pale hireling with the stubby pencil.

"Good morning," he said. "I had a rather clever thought just before I went to sleep last night and remembering the practice of Victor Hugo, Macaulay and other great writers I got up at once and made a note of it so that I could bring it to your attention. Such things are entirely out of my line, of course, but I realize that you are often glad to receive suggestions from outsiders."

"Yes, indeed," said the pale hireling. "What is the idea?"

"It is in the nature of a play upon words, so to speak," he explained. "It is really a conundrum in a way. It is this: Why is a woman ascertaining the exterior dimension of a pastry dish composed of sliced apples and an upper and lower crust like a man purchasing 16 ounces of butter?"

"I know one that's better than that," observes the pale hireling. "Why is the boy emperor of China like a man who has been frozen out of a melon cutting in the stock market? Because he can't have a Pekin any more."

"But this one, you see, depends largely upon—"

"And why is Woodrow Wilson like Taras Halls? Because he can't have a Harper any more."

"Very good, but this of mine—"

"And why is a Carnegie library like a corkscrew? Because it's an Andy gift."

"Well, sir, the answer to mine is that one is bounding a pie and the other is boxing a pound. But I shall give the suggestion to some one who is more appreciative."

And out far out over the mysterious depths of the night flashed a meteor while adown the distance sighed the shivering wail of the wintry wind.

Under the Circumstances, Yes

The automobile is a fate
A fate that is rather close
For when the lottery runs I win
It's no use if it's a lemon.

His Loss Was Different.

"Letter writing is a lost art," said Mr. Rabbit.

Then he shook his head as if he thought of the sum he had been forced to pay in the breach of promise case and muttered: "If it is, it was lost when my time."

Beware of Ointments for Catarrh that Contain Mercury,

as mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten fold to the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by F J Cheney & Co, Toledo, O, is taken internally, and acts directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally and made in Toledo, Ohio, by F J Cheney & Co. Testimonials free. Sold by druggists, price 75c per bottle. Elbert Hubbard Says: "In order to get a thing done superbly well, you must focus on one thing." The one thing we have settled to do well is operating a dependable style store for women and children. We are putting all the enthusiasm in us into it, but to reach the hundred per cent mark we must have your co-operation. If we are doing things right we deserve your support, if not, help us to get right We believe in the slogan, "Dothan for Dothan." To out of town people, Dothan wants we want, only to sell you, what your store fails to supply. Dothan and S. H. W. Co. only want to supplement your store.
